

METAL STORM LIMITED

ACN 064 270 006

Equity & Debt Placement Update

BRISBANE, 14 December 2009 – Metal Storm Limited (ASX trading code: MST, OTC Symbol: MTSXY, PoMSOX Code:MSTG).

Metal Storm has previously announced the signing of an Equity Subscription Agreement and a Loan Facility Agreement for an investment of US\$35 million by Assure Fast Holdings Limited BVI (**AFHL**).

The first tranche of approximately \$2.1 million (US\$1.9 million) of equity capital (**First Tranche**) was initially scheduled to close on 3 November but had been extended subsequently until 7pm on 10 December. The Board gave a formal notice to AFHL on Friday requiring AFHL to remedy its non-compliance with the Subscription Agreement namely, the failure to provide the First Tranche funding.

The Subscription Agreement requires the Company to give AFHL two Business Days from the date of notice to remedy the failure to provide the First Tranche funding. Accordingly the Company will allow that time before any further action on the AFHL Subscription Agreement but reserves its rights. The Company has not yet determined if there is any economic value pursuing those rights.

As previously announced the Company is considering alternative equity arrangements and will advise on that once they are finalised.

About Metal Storm

Metal Storm Limited is a multi-national defence technology company engaged in the development of electronically initiated ballistics systems using its unique “stacked projectile” technology. The company is headquartered in Brisbane, Australia and incorporated in Australia. Metal Storm Limited technology and products are represented in the USA by Metal Storm Inc., which has offices in Arlington Virginia.

Metal Storm is working with government agencies and departments, as well as industry, to develop a variety of systems utilising the Metal Storm non-mechanical, electronically fired stacked ammunition system.

Metal Storm's weapon technology uses computer-controlled electronic ignition and a system of stacked projectiles, to achieve a completely non-mechanical gun that is very lightweight and compact, providing a very high firepower to weight ratio. The Metal Storm weapons system utilises multiple barrels mounted together on one platform which allows varying munitions types to be deployed in a single, low cost, lightweight weapon system. Firing the weapons by electronic ignition requires no moving parts, allowing reliable long term unattended weapon operation.
