Implementation of Convertible Notes Restructure

Brisbane, Australia – 24 September 2009: Metal Storm Limited (ASX trading code: MST, OTC Symbol: MTSXY).

Metal Storm confirms that the restructure of its convertible notes (**Notes**) under the Election Booklet and Prospectus announced on 12 August 2009 has now been completed.

The Company received 396 elections to hold Secured Notes in respect of 109,504,140 or approximately 77% of the Notes on issue. These notes have now become Secured Notes.

Metal Storm is pleased to announce that, due to Noteholders' strong support for the restructure, the Secured Notes have met listing requirements and are expected to commence trading on ASX from Monday, 28 September 2009. The Secured Notes will trade under the code: **MSTGA**.

As set out in the Election Booklet and Prospectus, Noteholders that elected to hold Secured Notes were today issued New Options on the basis of 5 New Options for every 7 Secured Notes held. A total of 78,217,067 New Options were issued to Secured Noteholders. The New Options will not be quoted on ASX.

The Company confirms that its existing Notes, known as Interest Bearing Notes, will continue to be quoted on ASX under the code MSTG.

The Board would like to thank the Noteholders for their strong support of the Company during this process.

About Metal Storm

Metal Storm Limited is a multi-national defence technology company engaged in the development of electronically initiated ballistics systems using its unique "stacked projectile" technology. The company is headquartered in Brisbane, Australia and incorporated in Australia. Metal Storm Limited technology and products are represented in the USA by Metal Storm Inc., which has offices in Arlington Virginia.

Metal Storm is working with government agencies and departments, as well as industry, to develop a variety of systems utilising the Metal Storm non-mechanical, electronically fired stacked ammunition system.

Metal Storm's weapon technology uses computer-controlled electronic ignition and a system of stacked projectiles, to achieve a completely non-mechanical gun that is very lightweight and compact, providing a very high firepower to weight ratio. The Metal Storm weapons system utilizes multiple barrels mounted together on one platform which allows varying munitions types to be deployed in a single, low cost, lightweight weapon system. Firing the weapons by electronic ignition requires no moving parts, allowing reliable long term unattended weapon operation.
